Information**

Access Panel 150 x 200mm

Provides a cost effective solution for easy access to hidden building services behind a ceiling or wall.

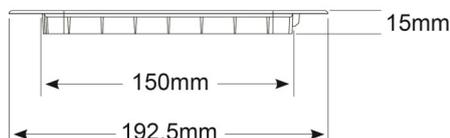

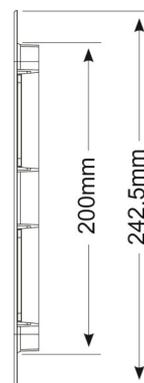

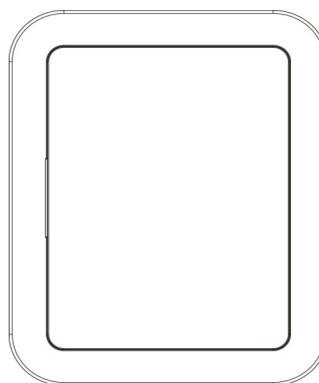

The panel is predominantly used in domestic household situations for access to electrical wiring systems, fuse box/switches, controls/connection links and valves/stopcocks/plumbing.

- Lightweight, easy to fit and manufactured in high impact polystyrene
- Has a textured finish that can be painted over if required
- Hinged along one side and can be completely removed for easy and convenient access

Installation

1. Prepare a 157mm x 202mm hole.
2. Run a bead of suitable adhesive (read usage instructions carefully) all around the back edge of the frame.
3. With the door securely fastened within the frame, insert the whole panel into the previously prepared hole and press firmly against the surface of the wall.
4. Remove and excess adhesive which has seeped from behind the frame and leave to set.
