Snowguard and Brackets

Product Information

The snowguard system is designed to prevent the fall of snow and tiles from pitched roofs. The system is mainly used in domestic applications to protect conservatories and other damageable installations below the pitched roof, and in commercial surroundings to protect public areas from falling debris.

Snowguard Panels

- Are manufactured from mild steel wire to a length of 2m
- Are available in heights of 150mm and 225mm
- Are hot dip galvanised after manufacture to give a long life finish

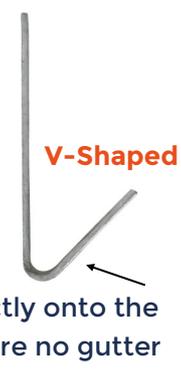

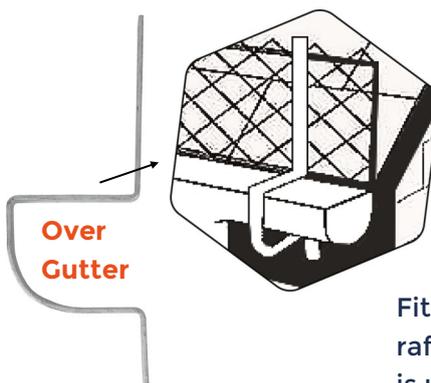

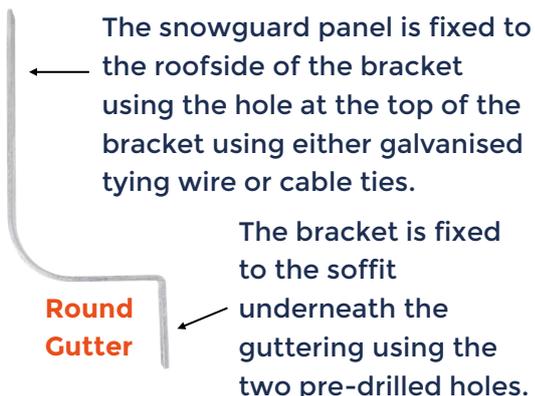

Snowguard Brackets are available in 3 types. All are made from 4mm galvanised steel and hot dip galvanised after manufacture:

- Round Gutter (or Half Round) to fix guard in front of the gutter
- Over Gutter to fix guard behind the gutter
- V-Shaped to fix to the top end of the rafter

Snowguard Code	Size	Bracket Code		
		Round Gutter	Over Gutter	V-Shaped
RSNG06	150mm x 2 Metre	RSNG06B	RSNG06OG	RSNG06V
RSNG09	225mm x 2 Metre	RSNG09B	RSNG09OG	RSNG09V

Fitting Instructions

All brackets have pre-drilled holes and should be fitted at regular 1 metre intervals.
